

LESSON PLAN

Unit 1: Lesson 1

Resources: Job Centre role cards

Learning Objective: I can explain what money is and describe how people earn it through work.

Misconceptions: Money is free to get. You only earn money if you have a special job. Only grown-ups can earn money.

Key Vocabulary: money, earn, wage, job, coins, notes

Teaching input:

- Show the What is Money slide. Recap what they already know about money and introduce the idea of digital money.
- Ask the children: "Where does money come from?" Children talk in pairs for one minute, then share ideas as a class. Address the common belief that money is simply given to adults - explain that most adults earn money by doing a job. For the work they do, they get money in return.
- Introduce the role play activity. Explain that today the classroom is a Job Centre - a real place where grown-ups can go to find work. Walk through one Job Centre card together as a class, modelling how the Job Centre Worker reads the job roles out to the Job Seekers.

Main Task: Visit the Job Centre

- Split the class into groups of four. One child in each group is the Job Centre Worker - they sit at the desk and read each job card aloud to their group. The other three are Job Seekers who listen carefully and discuss using the sentence stems on the board. Each child decides which job they would most like to do to earn money and why. The Job Centre Worker notes which job was most popular in their group.
- Children who need more support can be paired with a stronger reader to share the Job Centre Worker role. Children who finish early can think of a job not on the cards and describe what that person does to earn money.

Plenary:

- Stand up / sit down. Read out statements one at a time - children stand if they think it is true, stay seated if false.
- Finish by asking: "Has anyone here already earned money by doing a job?". Use this to reinforce that earning money through work starts at any age.
